

Photo Program Overview

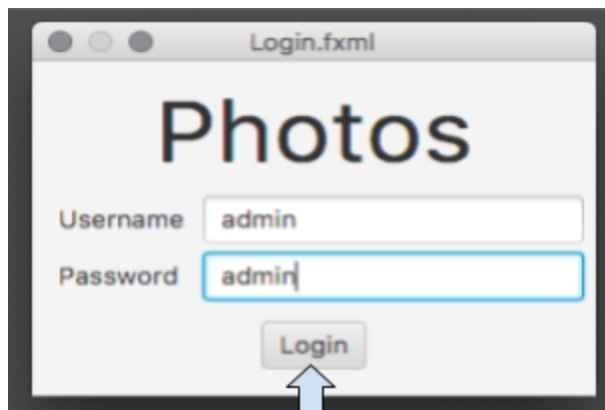

Login

The **Exit Button** in the **Top-Left Corner** will serve as the *safe* Quit functionality through the entire program except at the Image Window Scene

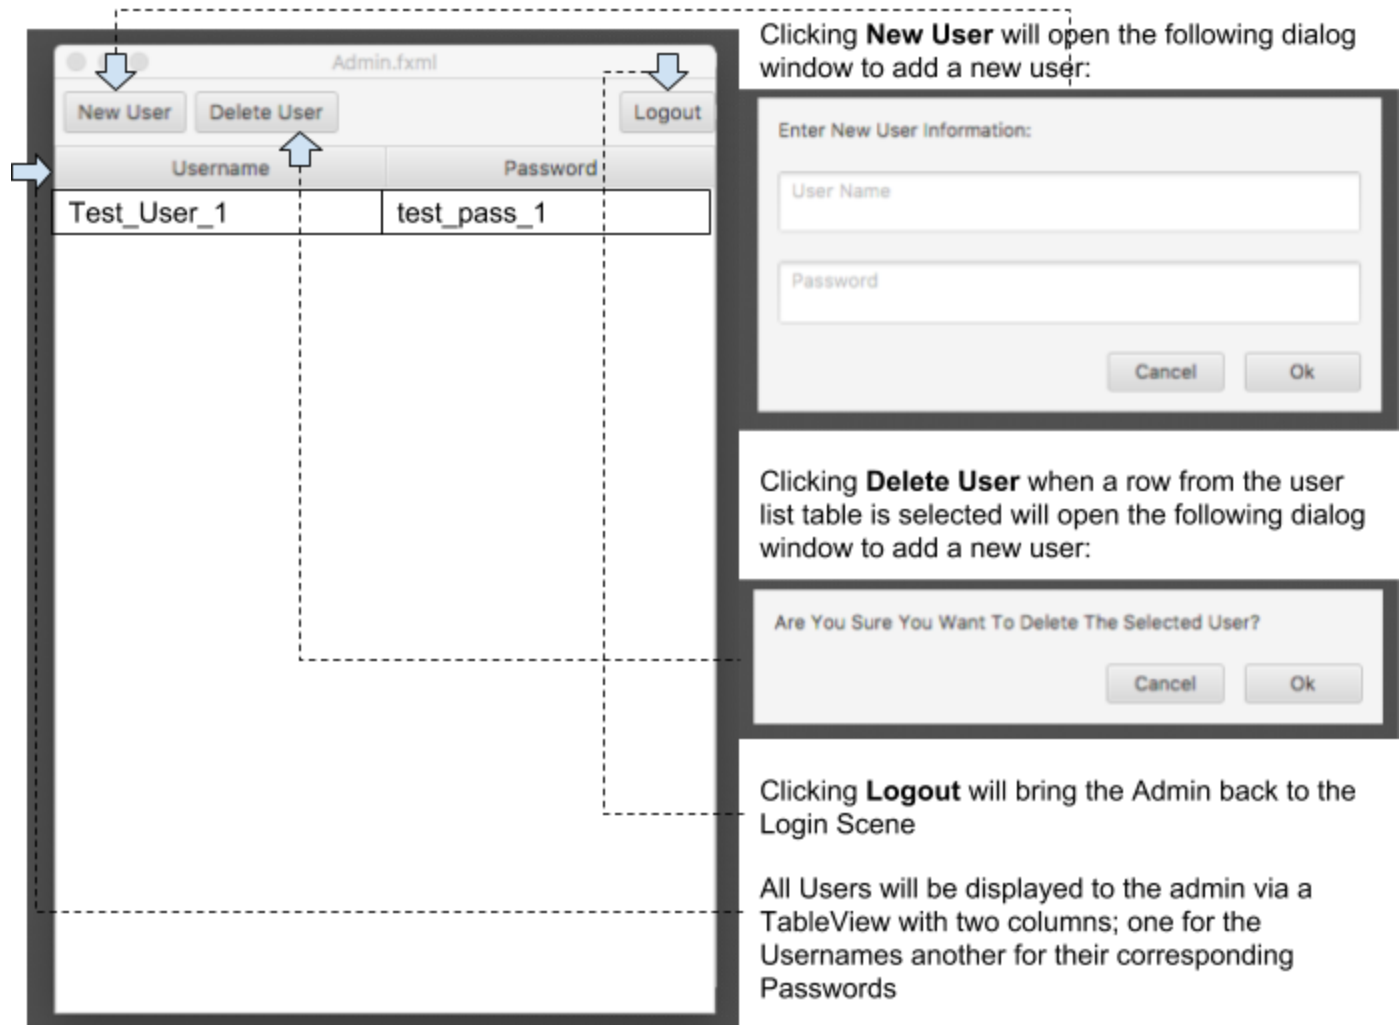

Upon Invocation, the program will promote the user to Login with a Username and Password

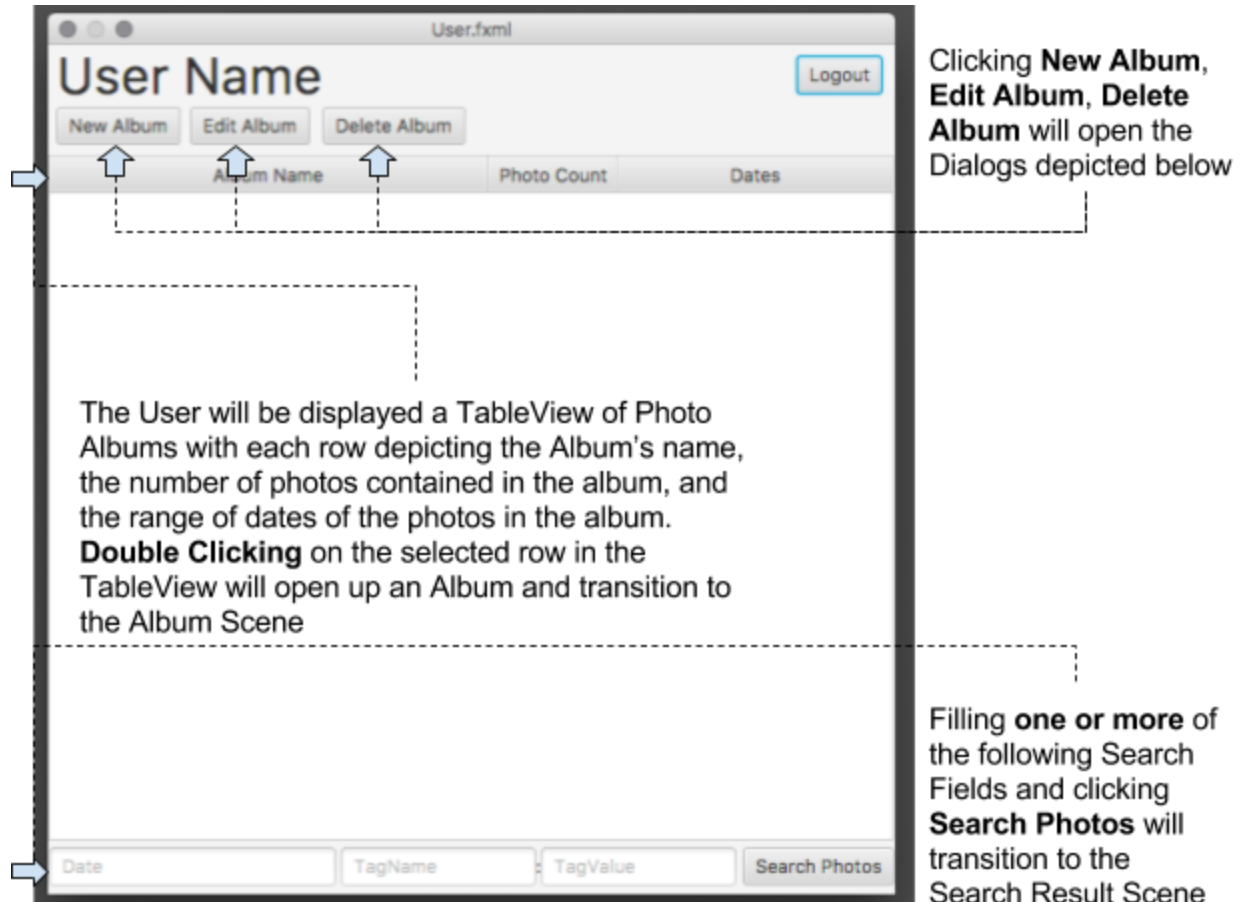

Clicking **Login** check for user authentication and in this case will transition to the Admin Subsystem

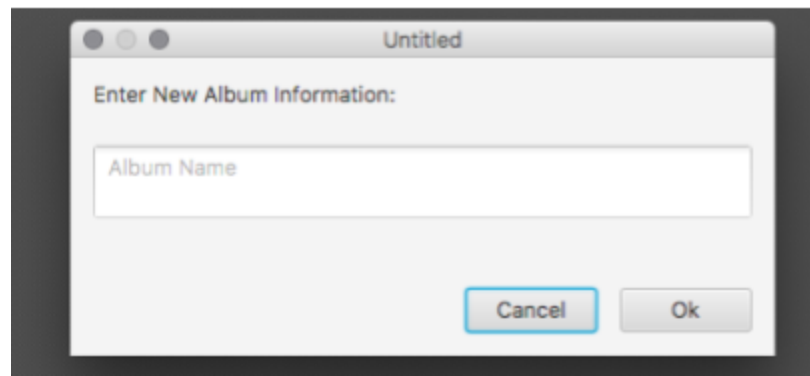

Admin System

User System

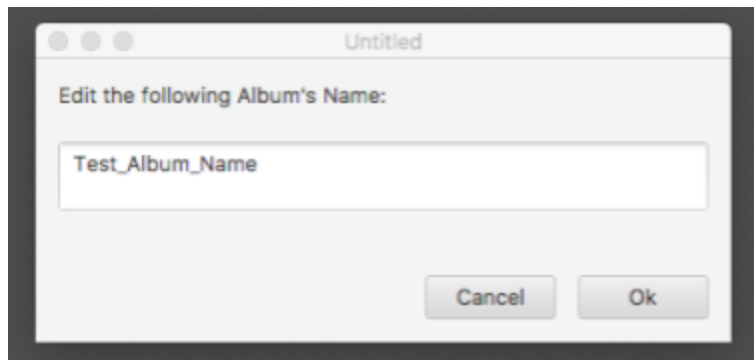

New Album Dialog Box:

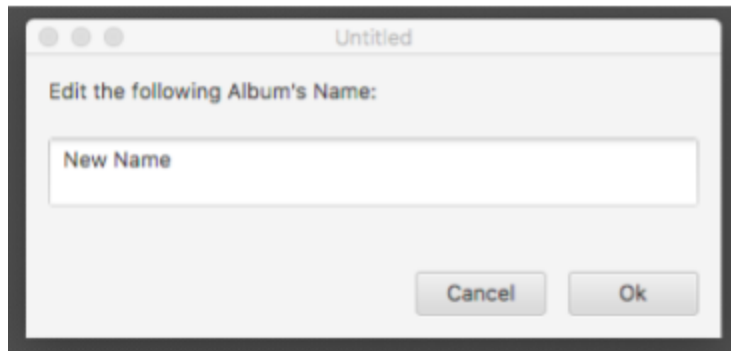

When **New Album** is clicked this dialog box will appear prompting the User to enter the name of the New Album then Press Ok to create the new album or Cancel to abort.

Edit Album Dialog Box:

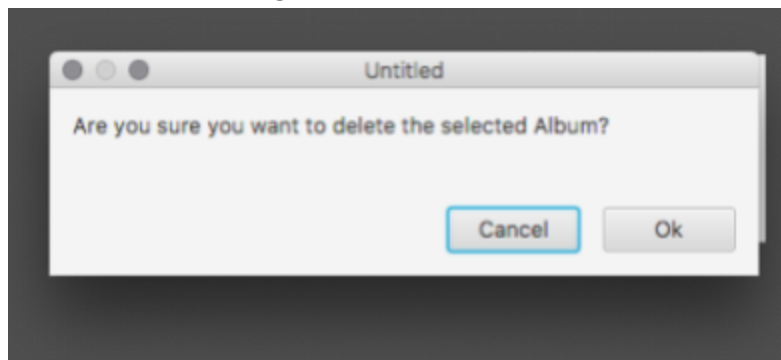

Clicking **Edit Album** while an album from TableView is selected will open the first dialog box prompting the User to edit the selected Album's Name by making a prepopulated TextField editable.

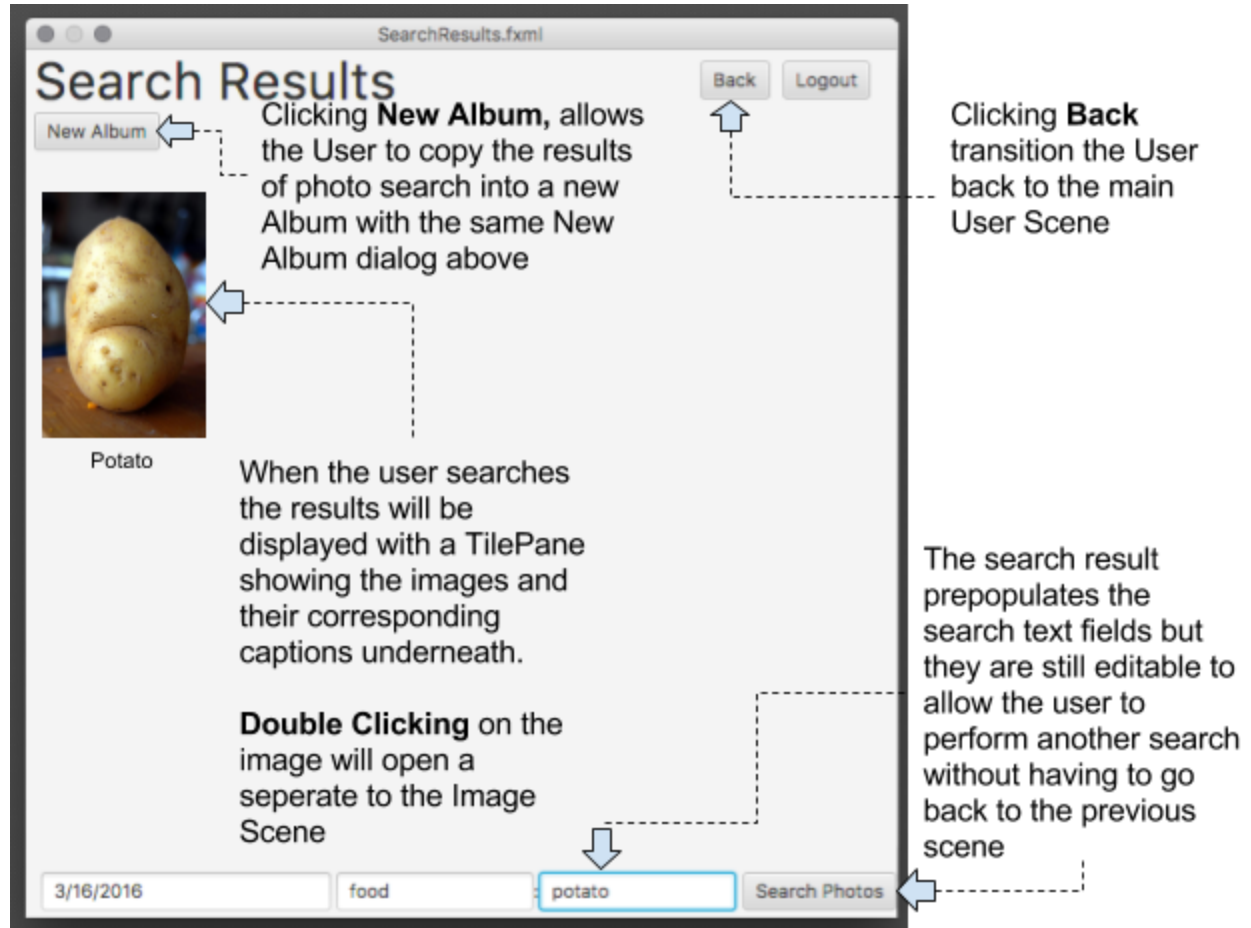

When the User has edited the Name as such they can either press Ok to change the Album name to the TextField's new value or Cancel to abort.

Delete Album Dialog Box:

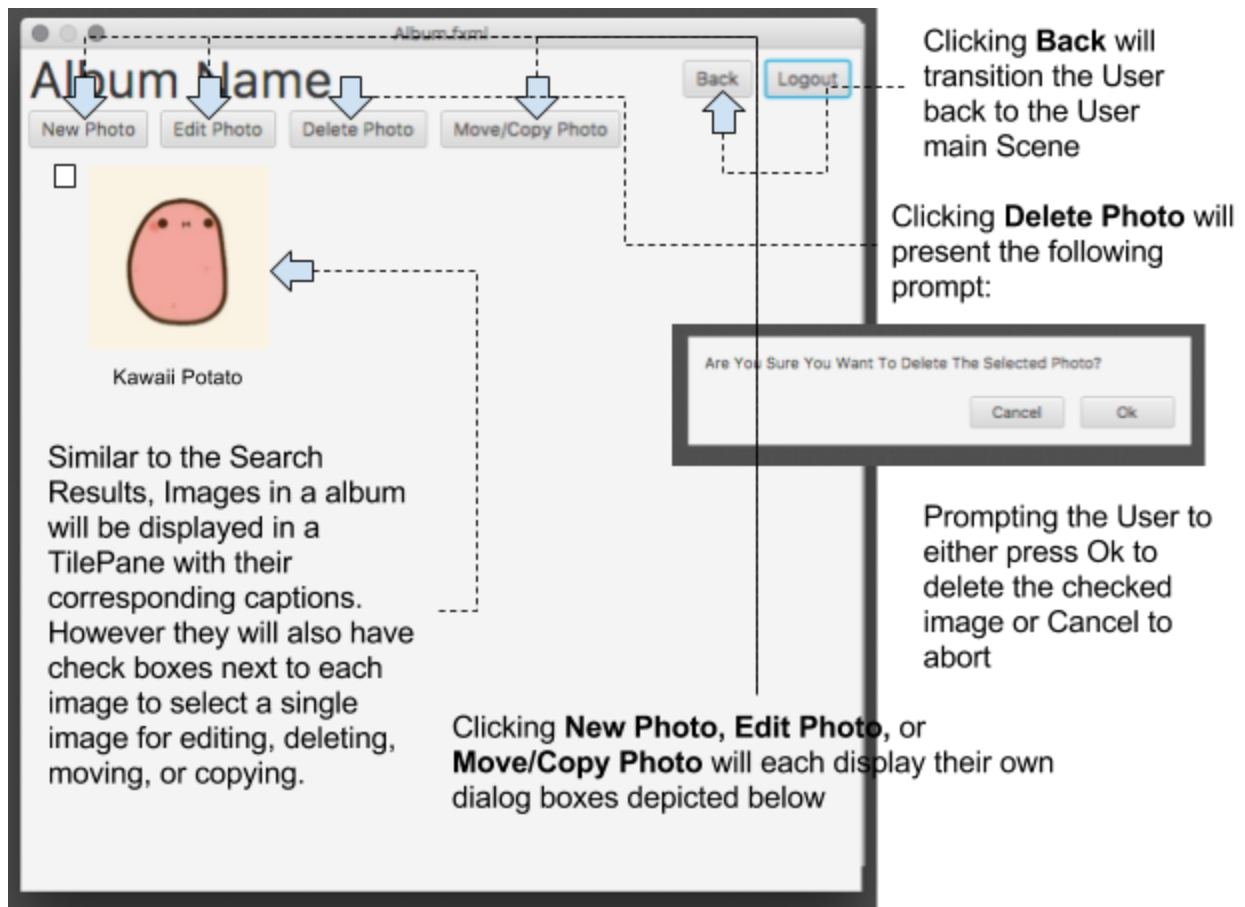

Clicking **Delete Album** will prompt the User with this dialog box. Clicking Ok will delete the selected album in the TableView or clicking Cancel will abort.
